# **Objectives**

Awareness of sustainable development issues and the ecodesign approach. The purpose of setting the context is to re-anchor the engineering student in a societal reality. Use examples to integrate the concepts and put them into practice. Through creativity exercises, learn to develop the ability to project towards future scenarios.

Keywords : Eco-design, circular economy, environmental and social impacts, sustainable development

Programme	<ul> <li>From the planet to the products:</li> <li>Approach to sustainable development, social responsibility of organizations.</li> <li>Limits of resources.</li> <li>Ecosystem services, biomimicry.</li> <li>Issue of sustainable development, social responsibility of organizations, dimension environmental, social, societal.</li> <li>The challenges of eco-design in your design strategy.</li> <li>Sustainable development, environmental impacts, eco-design, life cycle</li> <li>Define the basic functional unit of any Life Cycle Analysis (LCA).</li> </ul>
Learning outcomes	<ul> <li>To be able to integrate environmental and social criteria into the design process.</li> <li>Understanding of social, environmental, planetary and local issues.</li> <li>Create new paradigms, innovate, question what already exists.</li> </ul>

Lecturers: Marie GOYON

| Lecturers : 12 | TC : 6 | PW : 0.0 | Autonomy : 0.0 | Study : 0.0 | Project : 0.0 | Language : FR

# **Objectives**

The program concern all students willing to create value by designing a new business, either as an entrepreneur developing her/his own startup, or as a business developer enlarging an existing company's activities portfolio.

The program relies on two main methodologies: design thinking, project management .

The course is organized with 2 tracks: startup creation and business development, each track with specific courses.

The two tracks aim to enable a project to be developed and piloted, from the idea to its technical, social and

Keywords : creativity, analysis, fieldwork, value creation, social innovation, entrepreneurship, intrapreneurship

Programme	Introduction to design thinking, theory and methods Creativity, ideation trainings : developing new ideas How to analyse innovation in a global context within economical, sociological, technological frameworks Initiation to ethnographic fieldwork and empathy methods Social entrepreneurship and social innovation Transform new ideas into business : introduction to value creation and marketing Communication Project
Learning outcomes	
Independent study	Objectifs : Teamworking : ideation, debate, structure, test, fieldworking. Negociation, management and communication
	Méhodes : Project based learning : Teamworking, workshops, coaching and pitchs
Core texts	YUNUS Muhammad, BUILDING SOCIAL BUSINESS: THE NEW KIND OF CAPITALISM THAT SERVES HUMANITY'S MOST PRESSING NEEDS, Public Affairs, 2010 ROGER Martin DESIGN OF BUSINESS: WHY DESIGN THINKING IS THE NEXT COMPETITIVE ADVANTAGE, Harvard Business School Press, 2009 BARTHELEMY A. et SLITINE R.ENTREPRENEURIAT SOCIAL INNOVER AU SERVICE DE L'INTÉRÊT GÉNÉRAL, Vuibert, 2014
Assessment	Project based evaluation : oral presentations and report

# DESIGN THINKING ET CRÉATIVITÉ

#### **DESIGN THINKING**

Lecturers: Marie GOYON

| Lecturers : 26 | TC : 4 | PW : 0.0 | Autonomy : 0.0 | Study : 0.0 | Project : 0.0 | Language : FR

## **Objectives**

The program understands innovation and its management by a global, multidisciplinary approach linking the analytical thought and the intuitive thought. Design thinking methodology implements a process of creativity involving user's feedbacks and usages, iteration in conception and prototyping.

Students will learn how to place a problem in a global perspective (economic, technical, sociological ...) and how to transform an idea into a business. The students will use the three pillars of design thinking approach : desirability, viability and feasibility.

Keywords : creativity, ideation, design thinking, user empathy

Introduction to design thinking theory and methods Creativity and ideation workshops Research and analysis Ethnography fieldwork Uses

Learning	<ul> <li>Be able to get an overview on a specific problem : desirability, viability,</li> </ul>
outcomes	<ul> <li>Work creatively and transversaly</li> </ul>
outcomes	<ul> <li>Adopt an iterative and user centered point of view</li> </ul>

· be able to work in an interdisciplinary context, manage an innovative project

feasibility

#### **Objectives**

The objective of this course is to train students in the management of the research project and its specificities (Go / No Go). This is done by a real situation on a case study which justifies a need for innovation (evaluation of a technological modification / breakthrough, ...), in an often multidisciplinary context, both at the level of the subject but also methods. Students must provide quantified answers to the problem posed.

Keywords : Innovation, transversality.

# CRÉATIVITÉ, ERGONOMIE, DESIGN, INNOVATION, COMPÉTITIVITÉ **INNOVATIVE DESIGN AND CREATIVITY**

José PENUELAS, Damien CONSTANT Lecturers: | Lecturers : 14.0 | TC : 0.0 | PW : 0.0 | Autonomy : 0.0 | Study : 11.0 | Project : 0.0 | Language : FR

### **Objectives**

Starting from the concept of values in the company, and the positioning of the company in the socio-economic context, the need for innovation in the company is explained; the positioning of Research and Development within the framework of an innovation strategy is underlined. The emphasis is on financing innovation. Innovation monetization and market approach strategies are built using marketing techniques, product positioning, pricing and value proposition development.

Students will be made aware of the process of creativity and put in a situation to become aware of the

Keywords : TRIZ, Design Thinking, C&K, innovation, marketing, strategy

Programme	Part 1 : 1. Strategic marketing 2. The need to innovate 3. Quantitative and financial analysis 4. R&D and innovation management 5. Build a business plan Part 2 :
	1. Different approaches to creativity. Problem solving method (TRIZ method):
Learning outcomes	<ul> <li>Modeling a problem within a technical system: Idealities, technical contradictions.</li> <li>Offer innovative solutions based on TRIZ principles.</li> <li>Analyze a design proposal.</li> <li>Establish a business plan based on a case study.</li> </ul>
Independent study	Objectifs : Case study in innovation.
	Méhodes : Work in groups of 3 students, oral restitution.
Core texts	Altshuller G., , <i>ET SOUDAIN APPARUT L'INVENTEUR : LES IDÉES DE TRIZ.</i> , Seredinski (Avraam), 2016
Assessment	Part 1: Restitution of the case study.

Lecturers: José PENUELAS, Romain SAUZET | Lecturers : 6.0 | TC : 6.0 | PW : 0.0 | Autonomy : 0.0 | Study : 0.0 | Project : 0.0 | Language : FR

### **Objectives**

Research consists of confronting what is not known or what does not yet exist. We are not starting from scratch, since we already have many individual resources (pre-existing knowledge; skills; models, etc.) but also collectives (e.g. expertise, external skills).

These resources will constitute some steps of the research process, but they will not answer all the problems, especially the general problems: why do we do research? What are we trying to promote? How should we do it? On what subjects? For what objectives?

Keywords : Expertise, Interdisciplinarityy, Innovation, Values, Progress, Big Science, Sustainable Development, Environment.

Programme	<ul> <li>4 lectures on two main themes: Interdisciplinarity &amp; The place and role of values in science.</li> <li>2 tutorials on case studies illustrating the two main themes: Big Science projects (Manhattan Project) and what value do we want to promote through research (transhumanism).</li> <li>A series of conferences on the means of financing research and the major challenges in terms of energy resources.</li> </ul>
Learning outcomes	<ul> <li>Develop a critic on the resources and values carried by R&amp;D.</li> <li>Understand the characteristics of contemporary research beyond immediate projects.</li> <li>To be able to debate socio-technical controversies.</li> <li>To be able to identify the major national and European research structures.</li> </ul>
Independent study	Objectifs : This activity is not concerned with framed autonomy activities outside personal work.
	Méhodes : This activity is not concerned with framed autonomy activities outside personal work.
