Objectives

The aim of this training course is to enable engineers to understand the various aspects of digital modelling (volume and surface modelling, integration with simulation (kinematics, calculation, manufacturing, etc.), which are necessary in particular for other training Two Mechanical and Mechanical Engineering Units of Solids and Structures.

Keywords : Digital Mock-Up, Numerical modelling, Simulation, Finite element calculations, PLM, Bézier surfaces, Modelling curves and surfaces

Programme

- Mathematical modeling of pole surfaces.
- Getting Started with the Catia V5 Software (Part Design).
- Surface modelling with Catia V5.
- Information about the 100% web-based Onshape solution.
- Mini-project: Implementation of modelling, simulation and calculation tools on a concrete problem of design or optimization of a technical system.

Learning outcomes

- Be able to model a technical solution using computer tools.
- Know how to manipulate current modelling and simulation tools.
- To be able to understand all the scientific and technical aspects of a project.
- Knowing the software tools of numerical modelling used in industry.

Independent study

Objectifs : Objectives: Develop and deepen the subject of the mini-project.
Methods: CAD sessions with teacher assistance.
